

## ULTRA ACCESS Official Company Endorsement

Endorsing Leachs as the global Scaffolding Industries no.1 equipment supplier.

Having 25+ (rapidly approaching 30) years within the British Scaffolding Industry (covering a number of roles, from scaffolder to management) - Ultra Access has pretty much seen it all, and we have been using Leachs products since the very beginning.

Our first set of tools - purchased in 2000 were from Leachs, as well as our first harness and first hard hat.

And our current set of tools, which we also purchased from Leachs in 2005 and having taken them all over the UK and in other locations across the world to work, are still in perfect working order - if but a little bit "beat up" / well used.

There are of course other companies available for scaffolding tools and equipment online - the internet is vast and has nearly endless options, but none have the catalogue of equipment, stocks of, are as proactive and innovative in their design and application as, or are the sheer quality of what Leachs manufactures, produces, exclusively promotes and sells.

We still purchase and use many of Leachs' tools and equipment even to this very day, as even still as we transition away from physical scaffolding duties, Leachs is our go-to choice.

They offer not only the type of quality that well justifies the costs, but the overall convenience of their one-stop-organisation for a whole number of scaffold, working at height and safety equipment, tools, PPE and other innovatiive products cannot be matched currently within the global scaffolding industry, or within British scaffolding respectively.

With their friendly customer service staff and their vast industry-knowledge and expertise - they make the whole experience of shopping with them, a pleasant one.

Leading the way, by collaborating with the likes of the fantastic Big Ben brand, and frequently building other professional partnerships with a number of similarly passionate scaffolding industry market leaders, helps show their commitment to the wider-global scaffolding industry and to safety whilst at the workplace, and in general.

Ultra Access receives to money or favour for this official publication (nor do we advocate to only use their products - as we all have the freedom to choose for ourselves), but we make this sincere endorsement solely in the aim of helping to improve the British scaffolding industry for the benefit of all, and we do believe that Leachs are simply the best in the business at what they do.

Please take the time to visit their website for a full list of their available products.  
And thank you for taking the time in reading this endorsement.
