

ULTRA ACCESS Company Statement of Intent

What is "Ultra Access"…?

Its an all-in-one scaffolding technical support consultancy, covering everything from; pre-tender surveys and scaffold estimating, to; scaffold inspections and scaffold after-care - and everything in between (excluding the actual supply and erect process).

A "one-stop-shop" for all your scaffolding operational requirements, if you like.

With more information found on our website; www.ultra-access.co.uk

Carried out in an independent and freelance capacity for our clients, across the whole of the British mainland (and Northern Ireland), please feel free to enquire for more details.

- Whats our aim?

Supporting the British scaffolding industry by carrying out our numerous services to the highest of standards, operating to within all current HSE law's, specifically; The Health and Safety at Work etc, Act 1974, the Working at Height Regulations 2005 and the latest best practice guidance within the scaffolding industry NASC's TG (Technical Guidance) and SG (Safety Guidance).

And by showing our commitment to health, safety and wellbeing, by holding various memberships, accreditations, insurances, and giving regular contributions to charity, plus promoting other worthwhile causes online, as well as our support for championing British patriotism - along with UADIP - our free information and guidance portfolio, we would like to "give back" to an industry that we have been involved in for many decades.

With those above mentioned decades of hard earned knowledge and experience, in multiple sub-disciplines within the scaffolding industry, including within the-wider; Construction, Industrial, Commercial, Residential, Rail (& other national infrastructure) and Entertainment Events sectors, Ultra Access aims to bring much needed support to everyone directly or indirectly involved within scaffolding.

And pledge the following (also on our website);

That Ultra Access (and all those affiliated to it) are happy to offer any scaffolders all the help and advice that they need (where we can), free of charge, as part of our commitment to helping improve the British Scaffolding Industry for ALL within and involved with it.

- Why do we make this pledge?

No scaffolders = No scaffolding industry, and the knock on effect would be catastrophic for those sectors who've come to rely this ancient and incredibly important trade, essentially crippling them. As well as dealing a massive blow to the British economy as a whole (in a nut shell).

"Proudly supporting the British Scaffolding Industry"

Please fee free to get in touch if you require or wanted to know more of any of our (paid) scaffolding-related services or even just for (free) help, support and advice.

Thanks,
~ Ultra Access
